

Final Project Documentation

Idea: 3 quizzes

Point of project:

- Quizzes to guess something about the user

Homepage

- 3 buttons to bring people to different quiz

Quiz Pages

- Make form with radio to hold 4 questions and give each option a value, probably 1 2 3 4.

If mostly 1's user has x preference, if mostly 2s user has y preference, etc.

For 5-23-2022

- Make question component work with props
- Pass the question and an array of choices

To do:

- Add logic to tell user the app's guess at something about them based on quiz answers
